**SOUTH HIGH GIRLS SERVE ICE CREAM**  
 The South High Girls' League last week sponsored an ice-cream social on campus.  
 Autumn Leaves was the theme for the get-together, which gave all new girls an opportunity to become better acquainted. Other coming Girls' League activities are a Capri Day, Friday, Christmas Welfare Project, Dec. 14-18, and the annual winter formal, Dec. 11.

# Replenishment District Candidate Tells Views

By CHARLES D. BARKER, INDUSTRIAL ENGINEER  
 (Mr. Barker is candidate for director from Division 2 in the proposed Central and West Basin Water Replenishment District. — Ed.)  
 The southern part of Los Angeles County has a priceless natural reservoir which slowly but surely is being destroyed.  
 This natural resource is our huge underground water storage reservoir which once was full and is now being seriously depleted by over-pumping.  
 In the coastal plain which covers the southern portion of the county there are no surface reservoir sites of any size — only a few small ones. We have always depended on the underground reservoir for our storage. Engineers have estimated that to duplicate the capacity of our underground basins above ground in surface tanks would cost more than \$7,000,000,000.  
 This \$7,000,000,000 asset now is in danger of being destroyed by sea water intrusion.  
 Continuous overpumping has already pulled in sea water underground in coastal areas and can ruin the en-

tire underground reservoir unless we replenish it to a safe level.  
 This replenishment is the purpose of the Central and West Basin Water Replenishment District, formation of which will be submitted to voters at a special election Tuesday.  
 We have a water deficit in our underground reservoir of 700,000 acre - feet (288,000,000,000 gallons). We are adding to this deficit at the rate of 165,000 acre - feet a year (53,000,000,000 gallons). This is the amount we are pumping out above and beyond the natural replenishment through rainfall.  
 The Water Replenishment District will add 165,000 acre-feet to the underground each year in sand and gravel spreading basins along the San Gabriel and Rio Hondo rivers and in pressure recharge along the San Gabriel and Rio Hondo rivers and in pressure recharge wells in coastal areas.  
 This water will be purchased with money raised by an assessment on pumpers, not through a general tax levy. There will be a half - cent property - tax levy per \$100 of assessed valuation to pay for administration of the replenishment program. If a homeowner's assessed valuation is \$5000 (above average), he will pay a total tax of 25 cents for the replenishment program.  
 As an industrial engineer, I have followed the development of the replenishment concept from the beginning more than 10 years ago and I believe in it wholeheartedly.  
 In fact my interest in its success is so intense that I have filed as a candidate for director from Division 2 of the proposed district. This division includes: Dominguez - Carson, El Segundo, Gardena, Hawthorne, Hermosa Beach, Lawndale, Lomita, Manhattan Beach, Palos Verdes Estates, Rolling Hills City, Rolling Hills Estates, Redondo Beach, San Pedro, Torrance, and Wiseburn.  
 I would welcome the opportunity to use my engineering experience in the public service as a replenishment - district director, but I must emphasize that water replenishment itself is more important than who is elected to the directorial posts.  
 A "yes" vote for the district Tuesday is a must if we are to preserve our water security in years to come.

### Book Breakfast Set Wednesday

The county library's Harvest Book Breakfast, where authors and books are served along with bacon and eggs, will take place Wednesday at 8:45 in the Statler Hilton, Los Angeles.

The program was announced today by Dorothy H. Jamieson, librarian at the Torrance branch, 1345 Post Ave. She said seven Southland writers who have published books of outstanding merit within the last year will be presented by the breakfast chairman, Mrs. Elton Terry, the county's librarian in charge of regional services, and by Librarian John D. Henderson.
